EDUCATION

Boston University, Boston, MA   Sept 2017 - May 2021
Bachelor of Science in Hospitality Administration   GPA: 3.94
Summa Cum Laude, Recipient of Richard D. Cohen and AHLA Foundation Scholarships, Boston University Dean's List

PROJECTS

Flask Hangman Game - *Flask, Python, Bootstrap, HTML, CSS, JavaScript*
Developed a web application hosted on Render that allows users to create accounts, customize profile, play single player hangman with over 6800 words, and save game statistics. Project displays usage of routes and view functions, HTML templates and inheritance, integration of a SQLite database managed by object-relational mapping, APIs, etc.

Calculator Web App - *HTML, CSS, JavaScript*
Designed a calculator with ability to perform basic arithmetic and modulo with integers, negative numbers, and decimals. Application includes a help section, memory log, and keyboard support. It showcases DOM manipulation, keydown event listeners, CSS formatting, media queries, and different types of conditionals.

Rock Paper Scissors Game - *HTML, CSS, JavaScript*
Implemented a twist on a classic game that demonstrates understanding of fundamental concepts such as functions, loops, conditionals, setTimeout method, event listeners, callback functions, animation and keyframes, transforms, etc.

Weather Report - *Python*
Coded a script to interact with the Open Weather App API to return current weather data and daily forecasts up to eight days. Report accepts user-inputted locations/zip codes and returns longitude and latitude from Geocoding API, which are used for reports of current temperatures, weather, and forecasts intended to aid upcoming trip planning.

WORK EXPERIENCES
